ER3340

Two Part Potting and Casting System

DESCRIPTION

ER3340 is a two part epoxy designed for use as an electrical general purpose potting and casting compound ideal for general maintenance. ER3340 is available in pre-measured kits of 1 pound, 2 pound and 100 grams. ER3340 is also available in larger pail and drum kits. Material pours on with ease and has a fast room temperature cure in thin film. The cured material shows excellent resistance to a variety of chemicals including water, alkali, hydrocarbons, glycol ethers, ketones, detergents, and chlorinated hydrocarbon solvents.

Data contained herein are believed to be reliable. Fit-for-use testing should be conducted by each user.

BENEFITS

Available in Pre-measured kits
Class H temperature use

Excellent Coverage
Excellent Chemical Resistance

TYPICAL PROPERTIES (cured 7 Days at 75°F)

Two Part Potting and Casting System

APPLICATION PROCEDURES

Carefully weigh out appropriate amounts of resin and hardener into a clean mixing container and thoroughly mix until all streaks and striations are gone. Scrape the sides and bottom frequently to ensure complete mixing.

CAUTION: Unmixed compound from the sides or bottom of the container can cause soft spots or uncured areas in the completed piece. To prevent this, transfer the entire mixed contents to a second clean container and remix for a short time before using.

PRECAUTIONS

For industrial use only. Keep away from children.

Refer to the Material Safety Data Sheets (MSDS forms) pertaining to this product before using.

Avoid contact with skin or eyes. In the event of an eye splash or contact, immediately flush with cold water for 15 minutes and contact a physician. If skin contact occurs, wash with mild soap and water. The wearing of safety glasses with side shields and impervious gloves is recommended.

RESIN AND HARDENER WARNING STATEMENT

May cause allergic skin reaction. Avoid all contact with skin, eyes, and clothing. Wash thoroughly after handling.
